A close-up photograph of a black industrial probe with a silver tip, positioned above a grey metal part on a machine table. A red laser dot is visible on the part. The background is blurred, showing industrial machinery. A thick orange line forms a large 'V' shape, and a white line forms a large 'L' shape, both overlaid on the image.

Industrial Metrology Systems

Co-ordinate Measuring Machines and
Accredited Services For Manufactures

Education

Aerospace

Our partners

We believe that success is achieved with the full adoption of our solutions, and it is our experience that defines our solution focused approach for our 400+ customers across the UK.

Our Team is deliberately structured to consist of equal numbers of both Account Managers and Application Engineers that specialise in specific areas of the business.

A Complete Range Of CMM Services

With over 23 years' experience, MSL brings a wealth of engineering experience to metrology, combining tools and software from leading manufacturers. Delivering various metrology services including supply, calibration, control, maintain and retrofit.

Retrofit

Prior to any retrofit, our experienced technical team will assess your existing CMM, by performing various tests to determine the characteristics and performance of the machine.

Metrolog X4

Metrolog X4 is compatible with almost every CMM and portable devices that is in use today, from the latest scanning device technology to your 40-year old CMM. Choose from a wide range of interfaces for simple “plug-and-play” connection to your existing or future measuring

Bridge CMMs

All bridge machines are built using the most advanced construction technology, and can be fitted with a vast array of probing systems, from single point touch probes to contact scanning and non-contact laser systems.

Kreon

The Zephyr range of laser scanners from Kreon are without doubt the most versatile 3D single-line laser scanners available today.

Equally at home on portable measuring arms and 3D CMM's, Zephyr scanners offer a range of scanning capabilities, depending on your exact needs in terms of speed and accuracy.

CMM Horizontal Arm

The COORD3 range of horizontal arms are the ideal solution for measuring thin-walled components, (such as car bodies, panels, doors, vehicle glass, dashboards) and the inspection of large mechanical parts such as engine blocks, castings, etc. All systems are available in single or twin measuring configurations.

Calibration

In addition to our standard maintenance and calibration services, we are also able to provide a UKAS Accredited Certification service for your CMMs and Portable Arms.

We now have a larger team of engineers, all accredited by UKAS to perform the extensive requirements of both CMM and portable arm verification according to National and International Standards.

Products

MSL combine decades of engineering experience with industry-leading manufacturing partners to help improve manufacturing workflows and processes. Together, we help bridge the gap between design, manufacturing and inspection.
