### 4500+ Machine models

Lantek gets the most out of any machine model with any technology.

### 18 Languages

Available for all our software systems to support our customers and partners.

### 1200+ Smart Factory Installations

Nearly a thousand MES/ERP installations integrated with our CAD/CAM worldwide.

### Industry 4.0 Digital Transformers

We help our clients to digitize all their industrial processes effectively and profitably.

## Lantek: A Global Leader

Lantek is a multinational which is leading the digital transformation of companies in the sheet metal and metal industry. With its patented manufacturing intelligence software, it enables factories to be connected, turning them into Smart Factories. It rounds off its range of services with CAD, CAM, MES, and ERP solutions for companies that manufacture metal parts from sheet metal, tubes, and profiles using any cutting technology (laser, plasma, oxycut, waterjet, shearing and punching).

Established in 1986 in the Basque Country (Spain), a prominent European hub for machine tool development, Lantek spearheads the integration of sheet metal and metal processing technologies. Our remarkable leadership within the sector is a testament to our commitment to innovation and global outreach. With Lantek, you're embracing the future of metal manufacturing, where efficiency, precision, and excellence are the guiding principles.

## IMPROVE YOUR FACTORY EFFICIENCY

Imagine a factory where all machines work together intelligently, maximizing efficiency and minimizing errors. That is the reality we offer at Lantek, where we have been leading the digital transformation of the sheet metal industry for more than 35 years.

100+ Countries  
350+ Employees  
33.000+ Customers  
21 Offices

### ex Lantek Expert

THE WORLD'S MOST ADVANCED CAD/CAM NESTING SOFTWARE

Lantek Expert provides the most advanced nesting algorithms and machining strategies (Thinkingmetal Technology) for any of the existing cutting (laser, plasma, oxy-fuel, water jet technologies) and punching machines.

### f3 Lantek Flex3D

THE MOST ADAPTABLE CAD/CAM 3D SOFTWARE IN THE METAL INDUSTRY

Lantek Flex3D is the most flexible 3D CAD/CAM software, totally engineered by Lantek and conceived for automating the CNC programming for 3D machining tubes, pipes, beams, profiles, and sheet metal.

### m Lantek MES

THE SHEET METAL MES SOFTWARE THAT WILL BOOST THE PRODUCTIVITY OF YOUR FACTORY

Lantek MES is the family of Lantek products intended for companies who wish to acquire a complete and competitive solution to manage and optimize their manufacturing processes, having real time control of all the different activities taking place in the workshop.

### in Lantek Integra

SOFTWARE PLATFORM FOR ADVANCED MANUFACTURING IN COMPANIES TRANSFORMING SHEET METAL, TUBES AND BEAMS

All-in-One Management Software for Sheet Metal Industry. Handle sales, manufacturing, purchasing and inventory from the same platform.

in Lantek Integra **Purchases**

in Lantek Integra **Sales**

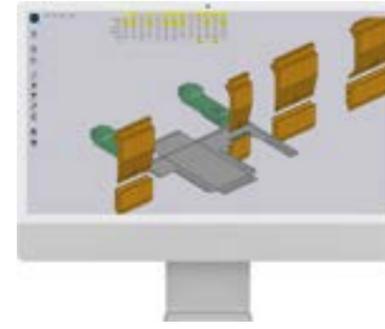

in Lantek Integra **Quotes**

in Lantek Integra **Outsourcing**

### be Lantek Bend

REVOLUTIONIZE YOUR BENDING PROCESSES WITH LANTEK BEND

Lantek Bend is the ultimate solution for flexible production. By leveraging our Design to Manufacture process and pre-production part validation, you can expect significant cost savings, while also increasing productivity, reducing scrap rates, and accelerating delivery times.

Bending Made Easy

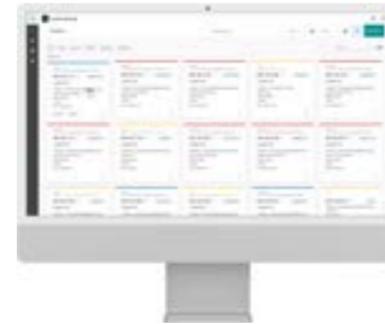

Minimize effort, maximize efficiency

Advanced algorithms for fast bending

### iQ Lantek iQuoting

A COST CALCULATION SYSTEM THAT ENABLES THE GENERATION OF QUICK AND ACCURATE QUOTES

A powerful SaaS cloud app that simplifies your quoting process. Generate precise quotes in just five easy steps from any device with an internet connection, without sacrificing accuracy.
