IndySoft

The World's Most Powerful Calibration and Asset Management Software

Complete Calibration Management

Track unlimited equipment, manage calibration schedules, receive notifications, print stickers, and generate certificates while maintaining detailed asset records with specifications, calibration history, and location.

Fully Configurable

When we say configuration, we mean it. Unmatched options allow you to customise the software to your workflow and data requirements rather than conform your business to how the software operates.

Anywhere, Anytime Access

Embrace the flexibility of cloud-based management. Focus on your core business, and we will ensure your calibration data is securely accessible from any location.
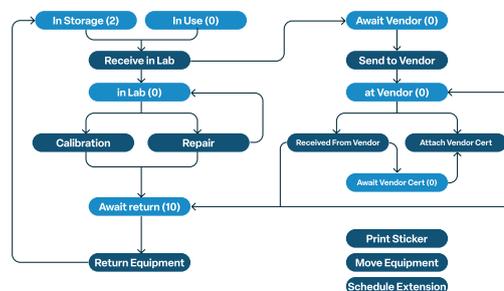

Uncomplicated Compliance

Say goodbye to compliance worries with built-in controls and easy access to the documentation required to effortlessly demonstrate conformity with industry standards and regulations.

Built by Calibration Experts, for Calibration Experts

With over 25 years in the business and a team with more than 150 years of direct industry experience, we genuinely understand the challenges you face. Our team of leading metrology experts ensures our software is built with the most comprehensive set of calibration-ready features available, and equips you with the tools to make your business operate more efficiently and achieve greater profitability.

"Overall, the best asset management/ calibration software out there. Flexible, powerful, and can do just about anything. The customer support is the best I have experienced with software."

Vincent Benenati
Quality Assurance Manager
Atlantic Scale Company

Meet Compliance Standards

- Built-in features help ensure compliance with widely-accepted standards such as the ISO- 9000/9100 series, ISO-17025, FDA 21 CFR Part 11, and more.

- Maintain a comprehensive history of all user interactions to preserve complete audit trail.

- Supports all AIAG MSA Handbook Studies: R&R, Bias, Linearity, and Stability Studies.

Save Money

- Install on unlimited workstations, users only consume a license while actively using the software (concurrent licensing).

- All-in-one solution includes Tooling, Maintenance, Uncertainty and Trend Analysis modules with every client license.

- Increased efficiency with automated calibration interval adjustment and technician workload scheduling features.

Boost Productivity

- ✓ Easy-to-use equipment templates, navigation, reports and searching.
- ✓ Automatic calculation of uncertainty and real time pass/fail data point readings.
- ✓ Integrated Barcoding to identify equipment and to easily drive workflow.

Integrate with External Systems

- ✓ Embedded custom scripting environment allows for IndySoft or your own staff to create integrations.
- ✓ Financial/accounting software integration saves time and reduces errors from dual entry.
- ✓ Optimise your planning with SAP/ERP system integration.

Tailor to Your Needs

- ✓ Create a view of your home screen, equipment view and other parts of the software to suit either an individual, a profile of a user or company-wide.
- ✓ Editing tools allow you to visually represent your processes with interactive flowcharts, customised searches, reports, and views.
- ✓ Distribute customisations enterprise-wide, or mix-and-match per company, user, or security role.

Flexible and Scalable

- ✓ Built to support worldwide multi-facility operations with centralised or per-facility workflows - all from one database.
- ✓ Foreign language capability and Unicode MSSQL Server or Oracle database support.
- ✓ Single User support with automated synchronisation for working offsite.

Produce Reports

- ✓ Automated emails for recall reports based on specified criteria.
- ✓ Simple-to-use standardised reports and a built-in custom reporting engine with access to the entire database.
- ✓ Statistics and Trend analysis modules provide data to make informed decisions based on performance and reliability.

Ensure Secure Operations

- ✓ No need for internal or outsourced IT; we have all the necessary controls to ensure your data is secure.
- ✓ IndySoft's SOC 2 Type II certification demonstrates our robust security controls and data protection measures.
- ✓ Robust access controls that can be configured to allow or deny individual access to any functionality in the software.
